

LE MASSON Philippe – 61 ans

Email : philippe.le-masson@univ-ubs.fr, Tél : 33 2 97 87 45 52

Since september 1993 : Full Professor to UBS (Université Bretagne-Sud)

Head of the CNRS laboratory IRDL (Institut de recherche Dupuy de Lôme)

CNU : 62

➤ **Graduates :**

2006 Habilitation to directing researchs (HDR) – Sciences for engineers

1991 Ph.D. University of Nantes - France, Thermal Engineering

1986 DEA Fluid dynamics and heat transfers, Ecole Centrale de Nantes

➤ **Teaching Activities :**

Sciences for engineers department – UBS (Thermal Engineering M.S.) : heat transfers, thermodynamics, modeling, Inverse and Optimization methods, thermophysical characterization, steam network - Boilers

➤ **Research activities :**

Thermophysical modeling of assemblies - Welding of metallic materials, additive manufacturing; inverse methods and thermal measurement methods (small thermocouples, multispectral pyrometer, etc.).

Professor Le Masson's research areas of interest include the scientific problems around the material assembling. He is head of the CNRS laboratory IRDL. He is the head of a research team on materials assemblies (www.IRDL.fr). Three axes are developed: the simulation, the material characterization and the thermal measurements. These axes feed the development of the inverse methods for Melting edge estimation, thermo-dependent thermophysical properties estimations, time-dependent properties estimations.

He is the co-author of 5 book chapters, 42 papers in international peer-reviewed journals and 47 papers in conferences.
